

Dear Sirs:

We live and travel in our motorhome 365 days a year. Without XM Radio we would be without radio contact many times going through mountains, tunnels, valleys and unincorporated areas. We depend on our radio for information and entertainment. If you have ever traveled across Nevada, Texas and many other states you know that AM radio is hit and miss. Please don't view XM radio as a threat. Certainly radio and TV were not a threat to each other. There is a need for all means of communication.

Thank you.

John E. Johnston
